

Pisces

Pisces is compassionate and *intuitive*. Those born under this sign are known to be *dreamers and healers*, empowered by an energy that awakens the imagination to fearlessly create. Their optimistic spirit lifts them above rough waters while their *bold confidence* inspires their tribe to live wild and free.

Water signs go through highs and lows just like the tide of the ocean - making this sign one that's *ultra-sensitive* and empathetic. Ruled by Neptune, the planet of fantasy, Pisces can often be off in their own world, vibrating on a level of refined energy that is sure to *attract miracles*.
